When a traditional wired landline isn’t the answer, choose a primary wireless connection to keep your connectivity running smoothly.

**Take your business wherever you need to go with an agile, comprehensive primary solution.**

Traditional landline internet solutions may not be economically or technically feasible in the following scenarios:

- Remote branch offices
- Mobile business locations
- New store or business location openings
- Kiosks or pop-up shops

Secure your business continuity with a complete, cost effective solution that includes a variety of broadband-enabled routers, 4G LTE nationwide connectivity coverage, and managed services provided by KORE Business Connect.

**Get Connected — and Stay Connected**

6% of the United States population still lack access to fixed broadband service at threshold speeds.¹
